Are You Soing Away This Summer?

New York City is not much of a summer resort—no wonder everybody who can possibly afford the time and the cost arranges to go away during the summer-or at least a part of it.

But don't allow an insufficient equipment to mar the pleasure of your outing. Remember that when you leave New York you practically abandon your base of supplies-you cannot hope to be able to purchase away from home the things you want, and expect to get them as you want them—and it is human nature to want very badly just the things we cannot have.

We have, therefore, prepared a list of the things we know people to require when travelling and sojourning beyond the pale of city dust and noise, and we would advise you to read it. Cut this advertisement out and save it for future reference. It's a pretty good index of the things you or members of your family will want during the summer holidays.

That we are well prepared to serve you goes without saying—it's our business to be ready when you want us to be-and it's also our mission to have the best of everything you require at the lowest prices it can possibly be procured for. The list herewith published will be but partial proof of our readiness and ability to supply the tourists' wants; for a more complete and practical demonstration you must, of course, visit the store.
